SUMMARY

The proposed act would impose a general requirement that every electric utility company charge a uniform rate per kilowatt hour of electricity. The proposed act would except from this general rule rates charged to other electric utility companies and to residential customers who heat their principle place of residence by electricity. The Act would also permit a different rate to be charged residential customers for the first three hundred (300) kilowatt hours they consume each month, and would authorize "peak load" pricing whereby a higher rate than the uniform rate per kilowatt hour may be charged during the periods of the day or seasons of the year when consumption of electricity is the greatest. The Act would authorize the Department of Public Utilities to issue implementing rules and regulations and provides for enforcement.

SUMMARY

The proposed act would impose a general requirement that every electric utility company charge a uniform rate per kilowatt hour of electricity. The proposed act would except from this general rule rates charged to other electric utility companies and to residential customers who heat their principle place of residence by electricity. The Act would also permit a different rate to be charged residential customers for the first three hundred (300) kilowatt hours they consume each month, and would authorize "peak load" pricing whereby a higher rate than the uniform rate per kilowatt hour may be charged during the periods of the day or seasons of the year when consumption of electricity is the greatest. The Act would authorize the Department of Public Utilities to issue implementing rules and regulations and provides for enforcement.

SUMMARY

The proposed act would impose a general requirement that every electric utility company charge a uniform rate per kilowatt hour of electricity. The proposed act would except from this general rule rates charged to other electric utility companies and to residential customers who heat their principle place of residence by electricity. The Act would also permit a different rate to be charged residential customers for the first three hundred (300) kilowatt hours they consume each month, and would authorize "peak load" pricing whereby a higher rate than the uniform rate per kilowatt hour may be charged during the periods of the day or seasons of the year when consumption of electricity is the greatest. The Act would authorize the Department of Public Utilities to issue implementing rules and regulations and provides for enforcement.

SUMMARY

The Legislature has placed this question on the ballot in order to determine whether the people favor or oppose the construction of an oil refinery and deep water port in Massachusetts. The vote on this question is not binding on the Legislature. The question deals with the general advisability of such construction and is not a specific proposal for a facility. If a specific proposal is made, it would be subject to approval by the communities directly affected and subject to any restrictions imposed by the Legislature.

SUMMARY

The Legislature has placed this question on the ballot in order to determine whether the people favor or oppose the construction of an oil refinery and deep water port in Massachusetts. The vote on this question is not binding on the Legislature. The question deals with the general advisability of such construction and is not a specific proposal for a facility. If a specific proposal is made, it would be subject to approval by the communities directly affected and subject to any restrictions imposed by the Legislature.
